***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29, drawn to the classification of audio data, classified in class 704, subclass 231.
- II. Claims 30-60, drawn to voice recognition in speech data, classified in class 704, subclass 248.

Inventions 1 and 2 are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination claims specific spectral analysis steps for extracting feature vectors from audio, including extracting magnitudes, and Mel warped triangular filtering, which are not required in the combination. The combination is not limited to speaker identification, but can also be used for recognizing different types of audio, including music; it also claims the calculation of feature vectors, which may include but are not limited to spectral features. In addition, the subcombination claims specific steps to perform the "temporal sequential smoothing" which are not required by the combination. The subcombination

has separate utility such as speaker recognition or verification for security purposes, to detect impostors using data recorded from authorized users.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dorothy Sarah Siedler whose telephone number is 571-270-1067. The examiner can normally be reached on Mon-Thur 9:30am-5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richemond Dorvil can be reached on 571-272-7602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
